1 July 1953

MEMORANDUM FOR: Chief, Medical Staff

SUBJECT : Career Training.

REFERENCE : Memo dtd 30 Jun 53 to DD/A fr C/MS, same subject. ILLEGIB

1. Confirming previous conversations which you have had with the undersigned and Mr. Wolf, then Deputy Director (Administration), this Office is in agreement that in order to meet the Agency's needs and provide career service for certain doctors on duty with this Agency we should undertake a training program which is comparable to, but in no case more liberal than that provided by other agencies of the United States Government, specifically, the Armed Services and the Public Health Service.

2. You are, therefore, authorized to work out this program in conjunction with the Office of Training. However, you should bring individual cases under consideration to the attention of this Office and take no implementing action where disapproval is indicated.

3. In the case of [] which is outlined in attachment "B" to referenced memorandum, it would appear that if [] intends to make his career with CIA, at least for the next few years, it would be reasonable and proper that he undergo training of the type suggested at this time. However, if it is believed to be in the best interests of the Agency to send [] to the field for two years of duty and defer his training until such time as the field duty is completed, I can see no reason why this should not be done.

4. You are, therefore, authorized to tell [] that it is the Agency's intent to provide such training upon the completion of the field service now being considered. He should thoroughly understand that unforeseen events and developments in the interim might change conditions to such an extent that the Agency would not consider it proper to provide the training contemplated and that this is not to be considered as a firm commitment to be lived up to regardless of events which might take place in the meantime.
